ALUMINUM CLAD-WOOD WINDOWS

THE PERFECT CHOICE
FOR ANY STYLE HOME . . .

ABOUT TRIMLINE CUSTOM WINDOWS

DEDICATION SINCE DAY ONE

For nearly 60 years, Trimline Windows has been designing and crafting custom wood windows for homeowners throughout the northern United States and along the East Coast. We take great pride in producing reliable, high-quality products, with each window carefully constructed from the finest materials to ensure lasting beauty, durability, and enjoyment.

With a wide range of muntins, hardware, screens, colors, and wood species, we can create a diverse selection of window styles, including double hung, casement, bow, bay, and specialty feature windows, among others. This flexibility allows us to accommodate nearly every customer request. Whether you're looking to enhance your home's appearance or complete a full renovation, we are committed to exceeding your expectations by delivering the perfect window, tailored specifically to your needs.

When you choose Trimline...you choose with confidence.

A product has never been more aptly named. Trimline's Eclipse double-hung truly does "surpass and outshine" its competition, with a look that's out of this world. The richly appointed Eclipse double-hung has the look and feel of wood windows from a bygone era. The Eclipse blends the ageless style and warmth of a wood interior with the convenience of an E-Z tilt sash, a low-maintenance aluminum-clad exterior, and the energy efficiency you'd expect to find in today's windows.

The Eclipse double-hung features standard combination tilt-lock hardware, available in a choice of five finishes (shown in Satin Nickel above). Both sashes travel in a concealed track system designed to preserve a more authentic-looking wood sash pocket, reminiscent of a look and feel of wood windows from a time ago.

Elegantly styled sash lifts or routed finger lifts (shown page 8) complete the hardware appointments. All models are furnished standard in pine with Trimline's EnerEDGE® warm-edge insulating glass spacer system, with Cardinal 270 LowE and argon gas.

ECLIPSE SERIES

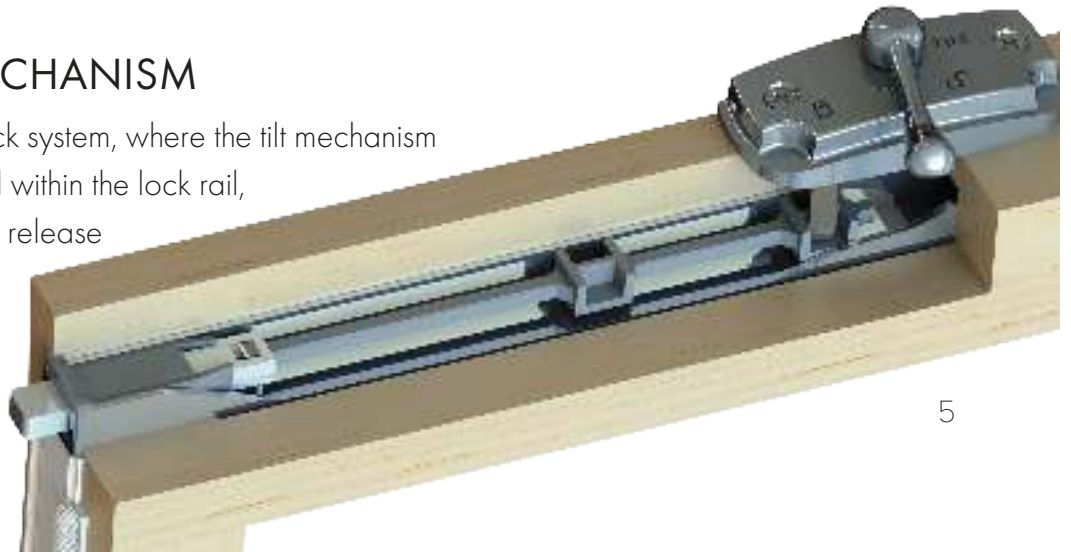

... PREMIUM DOUBLE-HUNG WINDOW

Eclipse Series EC300 . . . 4 ⁹/₁₆" Full Jamb shown in unfinished pine with 5/8" simulated divided lite grilles and satin nickel hardware
(Shown finished in colonial casing and in-sill for illustration purposes only)

CONCEALED TILT-LOCK MECHANISM

The Eclipse features a combination tilt-lock system, where the tilt mechanism is activated by the lock and is concealed within the lock rail, eliminating the need for surface mount tilt release latches for a neat, clean appearance.

ECLIPSE SERIES

... PREMIUM DOUBLE HUNG WINDOW

Eclipse Series EC200 3 1/4" Pocket Insert Jamb, shown in unfinished White Oak with 7/8" simulated divided lite Grilles and Oil Rubbed Bronze Hardware

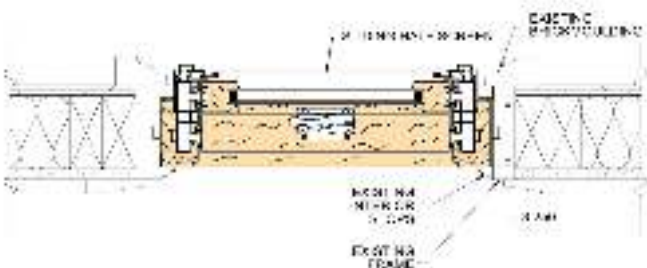

Trimline Concealed Track System eliminates exposed vinyl jamb liners, preserving the rich traditional look and warmth of wood

LEGENDS SERIES

DOUBLE-HUNG WINDOW

E-Z TILT LATCHES

Surface mounted tilt latches allow for both the top and bottom sashes to be tilted in for easy cleaning.

Legends Series DR200 Pocket Insert Unit available in Pine

Legends Series DHC200 (DR200) 3 1/4" Pocket Insert

Fits into the 3 1/4" sash pocket of the existing window frame so there is no mess involved with a complete window removal and original trim, paint or wallpaper remain undisturbed.

Standard sliding half screen with heavy extruded aluminum frame for longer life or available in optional full screen for maximum top/bottom ventilation.

COMBINATION UNITS AVAILABLE WITH FULL FRAME DR300 OR EC300 SERIES

Use when complete removal of old window frame is required or with nailing flange for new construction

Series DHC300 (DR300) shown in standard 4 9/16" jamb with pre-applied foldable nailing flange for new construction in bronze clad exterior.

Both DHC300 & 200 (DR300 & 200) available with factory applied extension jambs.

Shown factory mulled in beige exterior cladding with matching picture window.

Optional Radius
Interior Casings

2 1/4" Beaded Colonial

3 1/4" Beaded Colonial

LET'S DISCUSS PERFORMANCE

GLASS:

Trimline high-performance (HP) LowE glass meets our exacting standards in delivering overall energy performance. Argon gas blend is used between the glass panes for additional insulation and our glass is heat-strengthened for increased durability.

This is why Trimline windows with high-performance glass carry a transferable Owner-to-Owner® 20-year limited glass warranty.

An optional insulating glass package is also available using two lites of LowE glass improving overall window U-values by 10%.

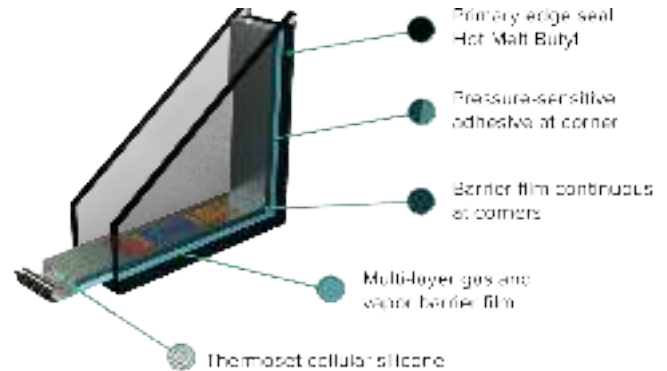

INSULATED GLASS UNIT SPACER:

Warm Edge refers to the spacer material between glass panes in insulating units. Many energy-efficient windows use thermally conductive metal-based spacers, which are less effective as a thermal isolation.

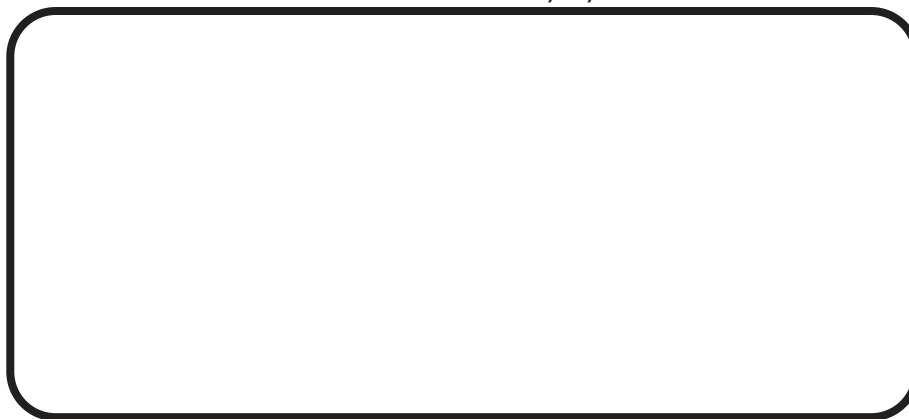

Homeowner Benefits:

- Increased comfort year-round
- Lower heating and cooling costs
- UV protection for furniture and walls
- Clear, color-neutral views
- Maintains healthy indoor humidity
- Virtually eliminates condensation
- Keeps homes cooler in summer and warmer in winter
- 1/8" glass virtually eliminates street noise
